PROFESSIONAL SUMMARY

Software developer with a strong foundation in full-stack, mobile and game development. A Systems Analysis & Development student with experience in agile environments. Focused on building efficient solutions using React Native, TypeScript, Node.js and C#. Committed to continuous learning, solid architecture practices and delivering high-impact products.

WORK EXPERIENCE

Developer

Oct 2025 — Jun 2026

Analítica Gerenciadora de Dados S/A

- Development and maintenance of mobile apps and web systems with responsive interfaces and backend integration.
- Applying good programming practices, system architecture and version control.

Game Developer

Nov 2024 — Mar 2025

Ara Game Studio

- Development of a 2D game in Unity (C#), implementing mechanics, controls and world interactions.
- Performance optimization and continuous testing in collaboration with designers and artists.

Full Stack Developer

Oct 2023 — Nov 2023

Serodonto

- Development of dynamic web applications, working on the front-end and back-end (TypeScript and React).
- Applying the agile Scrum methodology to ensure structured and collaborative deliveries.

FEATURED PROJECTS

James Barber · Full-Stack

Scheduling and management system for a barbershop. Frontend in Angular/TypeScript and backend in Python (FastAPI).

TypeScript

Angular

Python

InterfaceBusca API · Vue

Company search system based on data from CSV files.

Data Transformation / Web Scraping · Python

Data extraction from PDFs (Tabula) and automated file collection on the web.
